Applicant's election without traverse of claims 1-6 in Paper No. 8 is acknowledged.

Claims 7-18, 20-22 and 25-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

The disclosure is objected to because of the following informalities: the section titled "BRIEF DESCRIPTIONS OF THE DRAWINGS" is missing on page 23 of the specification.

Appropriate correction is required.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for 15-norerythromycin A and 15-norerythromycin B, does not reasonably provide enablement for 14-member macrolides having 13-methyl substituent. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The terminology "14-membered macrolides" encompasses all macrolides including those that are not related to erythromycin. Applicants have not provided any guidance on how to make and use macrolides that are unrelated to erythromycin and it would take an undue amount of experimentation to determine how to make and use such macrolides.

Art Unit: 1623

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by the terminology "incorporates an acetate starter". It appears that the structural formula of the claimed compounds does not contain an acetate moiety.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the International Patent WO 98/01571.

The International Patent discloses the claimed compounds on page 13. The claimed compounds are anticipated by the International Patent. In addition, if there are any differences between the claimed compounds and the prior art compounds, the differences would appear to be minor in nature and the claimed compounds, which fall within the scope of the prior art's disclosure, would have been prima facie obvious from the said reference's disclosure to a person having ordinary skill in the art at the time the instant invention was made.
